

Aquatight digital solar controllers

Make an Aquatight controller the heart of your solar pool heating system.

- Maximises heating capacity
- Easy operation
- Australian made
- Superior digital technology
- 3 year warranty

The V2 Deluxe for all solar installations

For long life and high performance

Aquatight Digital Solar Controllers

All V2 & V7 models have the following features:

- **Auto sampling** - automatically monitors water temperature to ensure maximum heat gain.
- **Winter mode** - for off-season maintenance - runs system briefly same time each day in winter to maintain equipment efficiency.
- **Solar lock-out** - automatically limits the pool being overheated.
- **Tropical mode** - Allows the cooling of overheated water in tropical regions.
- **Digital temperature sensors** - Unequaled accuracy, reliability and life-span.
- **Self diagnostic program** - will diagnose, identify and locate faults within your system for easy corrections and repair.
- **Battery back-up** - will maintain all settings for seamless operation in the event of a power failure or power surge.
- **Australian made** - manufactured to the highest standards for Australian conditions.

Latest technology with the simplest of operation:

The V7 is the ideal choice for retro-fitted systems or simply when a little more sophistication is required.

- Easy to operate
- Programmable, multi-function time clock
- Solar priority for maximum heating efficiency
- Automatic winter mode
- Auxiliary heater interlock (optional)
- Manual pool pump over-ride

Models also available with wireless roof sensors

V2RR Deluxe is available with a battery powered wireless roof sensor that simplifies installation and eliminates broken wiring.

V7RR is available with solar powered wireless roof sensor. Tropical mode not available with this option

Models available for control of electric heat pumps

H7 HEAT CONTROL

- Programmable heating start and end times
- Multi function time clock
- Chlorinator lockout (optional)
- Adjustable sample times
- Auxiliary heater interlock - (optional)
- Manual pump override

Ask your heating specialist, pool builder or pool shop about the large range of pool heating control products for Heat Pumps, Gas and Solar integration.
